2009-2013

Vinayka Mission University

Electronics Telecommunication Engineer

Skills

Profile

I'm a skilled software developer with a strong foundation in PHP, TypeScript, and JavaScript, and hands-on expertise in popular frameworks like CodeIgniter, React, Node.js, and Next.js. I specialize in building efficient, scalable, and user-friendly web applications that solve real-world problems. With a passion for clean code and a collaborative approach, I work closely with clients and teams to understand their goals and deliver high-quality solutions on time. I'm a quick learner.

WORK EXPERIENCE

Full Stack Engineer

Freelance Full Stack Engineer   April 2022 | Present

- File-based Routing to simplify navigation and ensure scalability across different application pages.
- Ensured that web applications were fully responsive across a range of devices and screen sizes, using modern CSS frameworks like Tailwind CSS, Shadcn-UI and Material-UI for styling and design consistency.
- Developed RESTful APIs and integrated GraphQL APIs to handle dynamic data requests between the front-end and back-end. By using Node.js, I ensured that these APIs were scalable, modular, and easy to maintain.
- Integrated NextAuth.js and Clerk into Next.js applications for seamless authentication and user management. Leveraged built-in authentication providers (Google, GitHub, etc.) and custom email/password authentication for user login.
- Implemented server-side rendering (SSR) in Next.js to optimize page load times and improve SEO, ensuring that web pages are indexed efficiently by search engines. Additionally, I used static site generation (SSG) to pre-render pages at build time for faster delivery and enhanced performance.

PayPines Financial Services

PHP Developer   August 2021 | February 2022

- Integrated third-party APIs and services, improving application functionality and user experience.
- Collaborated with front-end developers to integrate APIs and deliver a seamless user experience.
- Optimized database queries and managed large-scale database systems (MySQL), achieving significant performance improvements.

Innovovision Technology

Software Developer   February 2019 | July 2021

- Created reusable components and libraries, improving development efficiency and consistency across projects.
- Mentored junior developers, providing guidance on best practices and fostering a collaborative team environment.
- Conducted performance optimization and debugging of applications, ensuring smooth functionality and user experience.

Fillip Technologies

Software Engineer   February 2018 | January 2019

- Implementing responsive design and ensuring cross-browser compatibility.
- Participating in code reviews and providing constructive feedback to other developers.

Adacell Technology

Telecome Engineer   April 2017 | January 2018

- The radio transmitter, receiver and transceiver were installed and tested for proper functioning.

Cogent E Services

Customer Support Associate April 2017 | January 2018

- The primary point of contact for customer questions, complaints, and assistance and respond to customers through various channels, such as phone, email, and live chat.
